Pricing With Hardware Bundle

Setup fee, device lease, software-only option, and contract structure

For: Business partner discussion **By:** Goodcare Dental Booking Platform **Date:** May 2026

Executive Summary

We are considering bundling a **device** (iPad or Android tablet) with the platform subscription, secured under a **3 to 5 year contract**, to give clinics a turnkey appliance feel. This memo evaluates four pricing structures — including a **software-only** path for clinics that already own iPads — and lays out the full operating cost baseline on our side.

Key numbers:

- **Our fixed monthly operating cost: ~RM 922 / month** once we move off free tiers.
- **Software-only break-even**: ~clinic #8 (mixed tiers).
- **Hardware-bundled break-even**: similar ~#8 in net profit, but ~2× higher gross revenue per clinic.
- **Recommended default**: offer **all four options**, default to **Modular (Option C)** in the pitch.
- **Recommended contract length**: 3 years on hardware leases; 30-day cancellation on software-only.

1 · Our Operating Costs (the bills we pay)

This is what *we* pay every month to run the SaaS, regardless of how clinics are billed.

1.1 Core fixed costs (mandatory once live)

These hit the day the first real patient data goes into the system.

Tool / service	Monthly cost (RM)	Purpose
Claude Code	470	Developer tooling. Required for ongoing maintenance + new features.
Vercel Pro	95	Hosting. Required for commercial use. Hosts all clinic instances.
Supabase Pro	120	Database + auth. PITR backups, 30-day retention.
Domain (`.com`, amortised)	4	Primary domain hosting all subdomains. RM 50 / year.
Google Workspace (business email)	33	`name@yourbrand.com` for credibility.
Core fixed subtotal	**RM 722 / month**	

1.2 Amortised one-time costs

These are one-time spends, spread across their useful life.

Item	One-time cost (RM)	Monthly equivalent (amortised)
Legal: DPA template + Terms of Service (MY lawyer)	2,000–3,000	~50 over 5 years
Professional indemnity insurance	1,500–3,000 / year	~200
SSM business registration (if not already)	1,500	trivial
Amortised legal & insurance subtotal		**~RM 250 / month**

1.3 Scaling costs (add as we grow)

These come online at specific clinic-count milestones.

Tool / service	Monthly cost (RM)	When to add
Sentry (error tracking)	~120	At clinic #10. Catches production bugs before customers call.
Freshdesk / Intercom (support)	0 → 350	Free tier OK until ~clinic #20
PostHog / Mixpanel (analytics)	0 → 250	At clinic #30
Resend / SendGrid (email delivery)	0 → 95	When email reminders are added; free up to 100 / day
Freelance dev support (10 hrs / month)	~1,000	At clinic #20, for sanity
Marketing budget (Google Ads, FB Ads)	500–2,000	When scaling beyond friends-of-friends

1.4 Per-clinic variable costs

Single-tenant model (today — each clinic has its own Supabase project)

Item	Per clinic (RM)	Why
Supabase Pro	120 / month	Each clinic owns a Supabase project
Vercel	0	Shared team plan
Subdomain	0	Free under main domain
Custom domain (optional)	~8 / month	Pass-through to customer

Multi-tenant model (after refactor — all clinics in one Supabase)

Item	Per clinic (RM)	Why
Supabase incremental	5–15 / month	DB + bandwidth growth
Vercel incremental	0–2 / month	Function invocations

The refactor pays for itself at clinic #4. Every clinic above that on single-tenant adds RM 120 / month of pure cost.

1.5 Total operating cost summary

Phase	Monthly cost (RM)
Today — free tiers, no real patients	0 (only Claude Code: 470)
Live with 1 paying clinic, Pro tiers, multi-tenant	922 + 250 = ~1,172
10 clinics, multi-tenant	1,172 + 120 (Sentry) + 100 (incremental infra) = ~1,400
20 clinics, multi-tenant	+ 1,000 (freelance dev) = ~2,400
50 clinics, multi-tenant	+ 350 (support tool) + 250 (analytics) = ~3,000
100 clinics, multi-tenant	+ scaling = ~3,800

The one number to remember: RM 1,172 / month is our real baseline burn once we have one live clinic.

---

2 · Device Cost Assumptions

For partners who choose a hardware-bundled option. Final cost owed by partner — assumed prices below.

Package	Device	Bundled accessories	Total cost (RM)
Basic	Lenovo Tab M10 (or similar 10" Android)	Case + wall mount + charger	1,300
Standard	iPad 10.9" Wi-Fi (10th gen)	Case + counter stand + charger	2,500
Premium	iPad Pro 11" Wi-Fi	Case + counter stand + Pencil + charger	4,800

Recommended default: Standard. iPadOS reliability, 5+ years of OS updates, better PWA experience.

2.1 Recurring device cost (per device per month)

Item	3-year contract (RM)	5-year contract (RM)
Device amortisation (Standard iPad)	69	42
Device insurance	30	30
Replacement reserve (5–8 % / yr of device cost)	18	12
Delivery + setup logistics	2	2
Effective monthly cost per device	**~RM 119**	**~RM 86**

Basic device: ~RM 70 / month (3-yr). Premium: ~RM 195 / month (3-yr).

---

3 · Four Pricing Options To Offer

Option A · Fully Bundled

One monthly price covers software + hardware + training + support. Clinic pays one number.

Tier	Bundled monthly (RM)	Setup fee (RM)	What's included
Basic	200	1,500	Basic software + Standard iPad + training
Standard	280	1,500	Standard software + Standard iPad + training
Pro	380	1,500	Pro software + Standard iPad + training
Franchise	520 / branch	2,500 / branch	Franchise software + Standard iPad / branch

- 3-year contract on the hardware portion.
- Customer pays the same price each month, predictable.
- Margin on Basic tier is thin (software RM 80 + hardware RM 119 = RM 199 cost vs RM 200 charge).

Option B · Setup-Loaded

Large one-off fee absorbs device cost; clean software-only monthly thereafter.

Tier	Setup fee (RM)	Monthly (RM)	What setup includes
Basic	2,500	80	Standard iPad + training + onboarding
Standard	2,500	150	Standard iPad + training + onboarding
Pro	2,500	250	Standard iPad + training + onboarding
Franchise	3,500 / branch	400 / branch	Standard iPad + training + per-branch setup

- Clean monthly easy to compare vs Calendly.
- RM 2,500 upfront is a real ask — some clinics may want to spread payments.
- We get hardware capital recovered on day one (no amortisation risk).

Option C · Modular (recommended default)

Software tier and hardware lease are independent line items. Maximum flexibility.

Component	Monthly cost (RM)
Software tiers	Basic 80 · Standard 150 · Pro 250 · Franchise 400 / branch
Hardware lease (3-year)	Basic device 70 · Standard 119 · Premium 195

Component	Monthly cost (RM)
Setup fee (one-off)	1,500 — training + onboarding only (no device)

Sample monthly bills:

- Small clinic, Basic software + Standard iPad → RM 80 + RM 119 = **RM 199 / month**
- Mid clinic, Standard software + Standard iPad → RM 150 + RM 119 = **RM 269 / month**
- Large clinic, Pro software + Premium iPad → RM 250 + RM 195 = **RM 445 / month**

Why this is the default in the pitch:

- Clinics with their own iPads save money (Option D path below).
- Clinics that want turnkey get hardware in one line item.
- Upsell path is clear (upgrade device or software tier independently).

Option D · Software-Only (new — no hardware)

For clinics that already own a tablet, or only need the dashboard on staff laptops/phones.

Tier	Monthly (RM)	Setup fee (RM)	Contract
Basic	80	1,500	30-day cancellation
Standard	150	1,500	30-day cancellation
Pro	250	1,500	30-day cancellation
Franchise	400 / branch	1,500 + 500 / additional branch	30-day cancellation

- No hardware obligation, so no multi-year lock-in needed.
- Lowest entry price — best for cautious clinics, friend rate, and trial conversions.
- Setup fee still covers training, onboarding, customisation.
- Most flexible — clinic can install on existing devices, dentist's personal iPhone, the receptionist's PC.

4 · Scale Projections — All Four Options

Assumes the same mix in each scenario: 30 % Basic, 50 % Standard, 20 % Pro. Operating cost line follows the multi-tenant model after the refactor.

4.1 Revenue per clinic by option (mixed tier average)

Option	Average revenue per clinic per month (RM)	Composition
A · Bundled	281	Software 137 + Device 119 + premium margin 25
B · Setup-Loaded	137	Software-only monthly, but RM 2,500 / clinic upfront
C · Modular	256	Software 137 + Device 119

Option	Average revenue per clinic per month (RM)	Composition
D · Software-Only	137	Software only

4.2 Scale table — 100 % Option D (software-only)

# clinics	Revenue (RM)	Operating cost (RM)	Net profit (RM)
1	137	1,172	–1,035
3	411	1,202	–791
5	685	1,222	–537
10	1,370	1,400	–30
15	2,055	1,450	+605
25	3,425	1,550	+1,875
50	6,850	2,000	+4,850
100	13,700	2,800	+10,900
200	27,400	3,800	+23,600

Software-only break-even: ~clinic #11. Heaviest path to break-even but lowest customer acquisition friction.

4.3 Scale table — 100 % Option C (modular with hardware)

# clinics	Revenue (RM)	Hardware true cost (RM)	Software op cost (RM)	Net profit (RM)
1	256	119	1,172	–1,035
3	768	357	1,202	–791
5	1,280	595	1,222	–537
10	2,560	1,190	1,400	–30
15	3,840	1,785	1,450	+605
25	6,400	2,975	1,550	+1,875
50	12,800	5,950	2,000	+4,850
100	25,600	11,900	2,800	+10,900

Modular break-even: ~clinic #11, same as software-only in net profit terms — but gross revenue is ~2× higher, which matters for working capital and valuation.

4.4 Scale table — 100 % Option A (fully bundled)

# clinics	Revenue (RM)	Hardware true cost (RM)	Software op cost (RM)	Net profit (RM)
1	281	119	1,172	–1,010

# clinics	Revenue (RM)	Hardware true cost (RM)	Software op cost (RM)	Net profit (RM)
5	1,405	595	1,222	–412
10	2,810	1,190	1,400	+220
25	7,025	2,975	1,550	+2,500
50	14,050	5,950	2,000	+6,100
100	28,100	11,900	2,800	+13,400

Bundled break-even: ~clinic #9. Higher gross margin per clinic (built-in premium of RM 25), but harder sell on Basic tier (RM 200 sticker).

4.5 Scale table — 100 % Option B (setup-loaded)

This is unique because the RM 2,500 setup fee per clinic is a *cash injection*, not recurring revenue. Monthly economics are identical to Option D — but cash flow front-loaded.

Year	New clinics signed	Setup fee revenue (RM)	Subscription revenue (RM)	Total revenue (RM)
Year 1: 10 clinics	10	25,000	137 × 12 × ~5 = 8,220	33,220
Year 2: 25 clinics	+15	37,500	137 × 12 × 18 = 29,592	67,092
Year 3: 50 clinics	+25	62,500	137 × 12 × 37 = 60,828	123,328

Option B advantage: heavy cash injection in early years funds the operational burn. The trade-off: each clinic represents a single big sale negotiation instead of repeating monthly billings.

4.6 The realistic mix scenario

Most clinics won't all pick the same option. Realistic mix:

- 40 % choose Option D (software-only) — cautious clinics, friend rate, trials
- 40 % choose Option C (modular) — turnkey but flexible
- 15 % choose Option A (bundled) — clinics that want one number
- 5 % choose Option B (setup-loaded) — clinics with budget for upfront

Weighted-average revenue per clinic per month: **~RM 200**

# clinics	Revenue (RM)	Hardware cost (RM)	Software op cost (RM)	Net profit (RM)
1	200	71	1,172	–1,043
5	1,000	357	1,222	–579
10	2,000	714	1,400	–114
15	3,000	1,071	1,450	+479
25	5,000	1,785	1,550	+1,665

# clinics	Revenue (RM)	Hardware cost (RM)	Software op cost (RM)	Net profit (RM)
50	10,000	3,570	2,000	+4,430
100	20,000	7,140	2,800	+10,060

Realistic-mix break-even: ~clinic #11. Same as the pure cases — this number is robust across mix variations.

5 · Contract Length: 3 vs 5 Years (hardware only)

For software-only (Option D), there is no need for a multi-year commitment. Software is 30-day cancellation, no penalty.

For hardware-bundled options (A, B, C), the question matters:

Aspect	3-year contract	5-year contract
Monthly device cost (Standard iPad)	RM 119	RM 86
Customer total contract value (Standard tier, Option C)	(150 + 119) × 36 + 1,500 = ~RM 11,200	(150 + 86) × 60 + 1,500 = ~RM 15,700
Device age at end of contract	3 years (still usable, refresh option)	5 years (close to iOS EOL)
Customer commitment	Moderate	Strong

Recommendation: 3-year hardware contract with Year-3 refresh option (we ship a new iPad, customer re-signs for another 3 years). Aligns with iPad's useful life and gives a recurring upsell event every three years.

Early termination on hardware: remaining device amortisation balance + 1 month software fee. Standard SaaS+hardware practice.

6 · New Cost Cliffs With Hardware

Cliff 1 · Device damage at scale

Realistic rate: ~5 % per year (drops, splashes, accidents in clinic environment).

Clinics	Devices in field	Yearly damaged (5 %)	Yearly replacement cost (RM)
10	10	0–1	0 – 2,500
50	50	2–3	5,000 – 7,500
100	100	5	12,500
200	200	10	25,000

Mitigation: replacement reserve of RM 15–20 / month per device covers this. Above 50 clinics, formalise a hardware insurance partnership.

Cliff 2 · iOS / Android EOL during contract

Ship only devices launched in the last 2 years — leaves 3+ years of OS support remaining. Stay on iPad over Android (longer support window).

Cliff 3 · Supply chain shocks

Hardware can spike 20–30 % on tariffs, weak ringgit, or shortages. Mitigation:

- Lock device cost with partner via quarterly orders.
- Build 15 % margin into hardware lease price.
- Keep 5–10 device buffer once we exceed 20 clinics (~RM 25k working capital).

7 · Setup Fee Composition

Recommended setup fee: **RM 1,500** (Option C, D — modular / software-only) or **RM 2,500–3,500** (Option A, B with hardware).

What it covers in time and value:

Item	Hours	Cost equivalent (RM)
Initial kickoff (site visit or Zoom)	1	100
Clinic onboarding: doctors, working hours, templates configured	3	300
Patient list import	2	200
Staff training (nurse, doctor, owner)	3	300
WhatsApp template customisation	1	100
Branding + theme setup	1	100
First-month support and tweaks	4	400
Total time investment	**15 hours**	**RM 1,500**

For hardware-bundled (A, B): add RM 1,000–2,000 to cover device pass-through + delivery + on-site install.

8 · Decision Matrix For The Partner

Question	Recommended answer
Which pricing options should we offer?	**All four (A, B, C, D)**. Lead with C in the pitch; let customer pick.
Default device package?	Standard (iPad 10.9", RM 2,500 cost)
Contract length on hardware?	3 years with Year-3 refresh option
Software-only contract length?	Monthly, 30-day cancellation
Setup fee?	RM 1,500 (no device) / RM 2,500–3,500 (with device)

Question	Recommended answer
Damage policy?	Excess paid by customer; reserve covers most cases
Device sourcing?	Partner supplies; we resell at a 15 % margin
Equity / cost-share split?	To be agreed

9 · One-Page Summary

Item	Recommendation
Lead with	Option C (Modular) in the sales pitch
Also offer	Option D (Software-only) for budget-sensitive clinics
Reserve for	Options A and B for clinics asking for "one number"
Default device	iPad 10.9" Wi-Fi (~RM 2,500 cost)
Hardware lease	3-year contract, RM 119 / month effective
Software tiers	Basic 80 · Standard 150 · Pro 250 · Franchise 400 / branch
Setup fee	RM 1,500 (software-only or modular)
Our fixed monthly burn (Pro tiers, 1+ clinic)	~RM 1,172
Realistic break-even point	clinic #11 in net profit (across all options)
First-year cash injection from setup fees	~RM 15,000 (assuming 10 clinics signed)

— End of memo —
